

src/exception/NotSameStruct  
Exception.cpp

```
graph TD; A["src/exception/NotSameStruct  
Exception.cpp"] --> B["NotSameStructException.hpp"]; B --> C["exception"]; B --> D["string"];
```

The diagram illustrates the dependencies of the file `src/exception/NotSameStructException.cpp`. A vertical arrow points from this file to the header file `NotSameStructException.hpp`. From the header file, two arrows branch out to the `exception` and `string` headers, indicating that the implementation depends on these standard library components.

NotSameStructException.hpp

exception
